**READING 4 (Items 15 – 20)****(6 marks)**

Read the text. Are the statements True or False?

For each item, shade in the bubble () under the correct option.

Magpies are black and white birds which live in Europe. When they are two years old, they build their nests in tall trees.

The female lays her eggs in April. These eggs are usually light blue, spotted with brown. She sits on them for fifteen days. During this time the male brings food to the nest.

After the young birds hatch, both parents feed them for two months. They usually give them berries and small insects.

The young birds start flying after four weeks, but they stay with the parents until October.

When they are one year old, they join other birds to make bigger groups, so they can look for food together.

## ARRIVING AT FINAL SCORES

**VCB/ GRM/ RDG:** In these three sections, all student responses are of the objectively-marked, right-or-wrong type. So there should never be any discrepancies in the marks awarded.

There are two different procedures for ensuring that no such discrepancies occur:

- 1) No action required: With (machine-marked) 'multiple choice' and 'True/False' items, discrepancies are automatically excluded by the ePen marking system.
- 2) Action required: With 'short answer' items — in VCB 3 and GRM 3 — where the student writes down letters or words, there may be (accidental) discrepancies in the scores awarded by the two markers. The Supervisor/Adjudicator should be on the lookout for any such discrepancies, and if they occur, should read the students' response and award the correct mark.

**WRITING:** In this section, student responses are independently marked by two markers using their judgement (based on the wording of the Rating Scale provided). As a result, differences may sometimes occur between the two scores awarded.

In such cases, there are two possible procedures:

- 1) Acceptable differences: If — as in most cases — the difference between the two scores is small, i.e. just one level, the Supervisor/Adjudicator is not required to read the student's response. He/She should simply use the mathematical average of the two scores. (\*See below)
- 2) Unacceptable differences: However, if the difference between the two scores is substantial, i.e. more than one level, the Supervisor/Adjudicator should read the student's response and, after due consideration, decide on an appropriate mark.

## CALCULATION OF AVERAGES:

WRT 1		WRT 2 + WRT 3		WRT 4	
Pair of scores	Final score	Pair of scores	Final score	Pair of scores	Final score
4 / 3	3½	5 / 4	4½	6 / 5	5½
3 / 2	2½	4 / 3	3½	5 / 4	4½
2 / 1	1½	3 / 2	2½	4 / 3	3½
1 / 0	½	2 / 1	1½	3 / 2	2½
#####		1 / 0	½	2 / 1	1½
#####		#####		1 / 0	½

**IMPORTANT NOTE:** As in previous years, *individual* markers should *only* award the marks specified in the relevant Rating Scale\* (as in 'pair of scores' above). 'Half-marks' or 'in-between marks' (as in 'final score' above) can *only* be awarded when two (differing) individual marks are combined by the Supervisor/ Adjudicator.

[\* Note: This means that, even though the computer screen shows all the possible final scores, *individual* markers should *only* use those scores which are mentioned in the scale.]
