TEXT 1

Dear Sir or Madam,

I email you to complain about the disgraceful service I received when I attended the Baby Clinic at 9:30 on Thursday, December, 7th. I am a first time mother to a 10- week-old baby and was appalled at the attitude of the staff there.

I arrived in good time but was met with a careless administrator who left me waiting for almost 2 hours. Eventually, I was led in to see the Consultant who proceeded to scroll the mouse of the PC and then checked me and the baby in a rush without answering all my inquiries.

As you would expect, I am reliant upon the health professionals to advise me about the care of my baby. I do not feel that they delivered the level of service that I would expect to a new mother and a small baby.

I require an acknowledgement of this email letter, by return, a written apology from the Managing Director and a full explanation of how you will rectify this situation.

Sincerely,

Amel

- 8.** The mother's experience in the baby clinic was:
- new pleasant disappointing
- 9.** She properly met the consultant at:
- 11:30 am 10:30 am 9:30 am
- 10.** She insists that the manager should arrange for:
- a meeting an apology an appointment

READING 2 (continued)

TEXT 2

Dear Mrs Amel,

Thank you for your email regarding your concerns arising from your attendance at the Baby Clinic on 7th December 2017. I was sorry to learn of your experience. An investigation has been undertaken by the Chief Officer and the outcome has been shared with me.

Unfortunately, there was a technical error in your registration process. The administrator staff tried to inform you by announcing your name repeatedly but it seems that you left the waiting area for some time. By the time you heard the last announcement, the Consultant had received an urgent call from the Emergency Unit. He had already skimmed your baby's initial health test that was done at your arrival time. The results were good; therefore the Consultant examined you with easiness.

Nevertheless, I would confirm that the situation has been discussed with the staff member and all technical and courtesy instructions have been highly considered.

For any inquiries, please contact 23334566, Mr.Khalid.

Thank you for bringing your concerns to our attention.

Regards,

Chief Manager

11. The mother could not hear the first announcement of her name because she was:
- feeding the baby talking to some staff staying out of the waiting area
12. The pre-examination of the baby's health predicted that he was:
- healthy weak infected
13. Future technical problems in the clinic will be:
- ignored studied delayed

Read the text. Then complete the task.

Space Tourism

Space tourism is the term used to describe space travel for entertaining or leisure purposes. What was once only a dream - described in books such as Arthur C. Clarke's 2001: A Space Odyssey - is now becoming a reality.

Futurologists are scientists who attempt to develop predictions of what life will be like in the future. After the first man landed on the moon in 1969, they thought that hotels would be built on the moon by the year 2000. Futurologists also considered the possibility that, in the 21st century, families might go for a holiday on the moon. Neither of these predictions has come true yet - but the rapid development of technology may mean these predictions are a possibility in the years to come.

Space Adventures is currently the only company to have succeeded in sending paying passengers into space. Space Adventures worked with the Federal Space Agency of the Russian Federation and Rocket and Space Corporation Energia to facilitate flights for the world's first private space explorers. Each person paid over \$20 million for their 10-day trip to the International Space Station.

The American businessman Dennis Tito was the world's first space tourist. Tito flew into space aboard a Russian Soyuz rocket that arrived at the International Space Station on April 30, 2001. The second space tourist, South African businessman Mark Shuttleworth, took off aboard the Russian Soyuz on April 25, 2002, also bound for the ISS. Greg Olsen, an American businessman, became tourist number three to the ISS on October 1, 2005. On September 18, 2006, Anousheh Ansari, a telecommunications entrepreneur, became the first female space tourist and the fourth space tourist overall. Charles Simonyi, a software architect, became the fifth space tourist on April 7, 2007.

Following several successful explorations into space, several companies are now considering the possibility of enabling tourists to visit space. In order to make it more affordable, suborbital space travel is being considered by many companies, including Virgin Galactic. Passengers would be transported to a height of between 100-160km above earth, experience 3-6 minutes of weightlessness and a view of the stars before being taken back down to earth. This is expected to cost around \$200,000 per person.

Whilst it could be an enriching experience, there are some disadvantages to space tourism. Many critics have commented that a huge growth in the spaceflight industry could drastically speed up the process of global warming. The ozone layer would be damaged further, and the polar regions would suffer. In addition, space travel is only really a possibility for the super-rich. Although Virgin Galactic claims to be "opening space to the rest of us", there are still millions of people worldwide who wouldn't be able to afford it.

READING 3 (continued)

Task One: For each item, write a short answer (**not more than FOUR WORDS**).

Qs 16-20: Responses must be indicated clearly.

WRITING (GENERAL NOTES)

- The **wording of the descriptors** in the relevant Rating Scale should form the basis of all decisions (and discussions) on the marks to be awarded.
- There may well be different individual ways of approaching a task or interpreting a picture (or set of pictures), but a basic requirement for all answers is that they are **relevant**.
- If answers are **clearly not relevant** and the student has clearly not attempted the task that was set, **no marks** should be awarded.
- However, if a student has **genuinely attempted the task**, but their answer is only **partly relevant**, then a **reduced** mark (not zero) should be awarded.

WRITING 1 (10 mks)

10	<ul style="list-style-type: none">– Discusses the topic in a lively, interesting way, making effective use of supporting arguments.– The points made by the writer are logically organised and very clear.– Makes use of a fair range of structures and vocabulary, with a good level of accuracy.
8	<ul style="list-style-type: none">– Discusses the topic reasonably well, but use of supporting arguments is not fully effective.– The points made by the writer are reasonably well organized and mostly clear.– Use of grammar and vocabulary is reasonably correct, though rather limited in range.
6	<ul style="list-style-type: none">– Expresses opinions with some use of supporting arguments, but only in a limited way.– The writer makes an attempt to organise his/her points, but this is only partly effective.– There is a noticeable lack of accuracy in the use of grammar and vocabulary.
4	<ul style="list-style-type: none">– Makes an attempt to discuss the topic, but the result is unconvincing and clearly inadequate.– Weak organization makes it difficult to follow the points being made by the writer.– Grammar and vocabulary contain frequent serious errors.

ARRIVING AT FINAL SCORES

LST/ VCB/ GRM/ RDG: In these four sections, all student responses are of the objectively-marked, right-or-wrong type. So there should never be any discrepancies in the marks awarded.

There are two different procedures for ensuring that no such discrepancies occur:

- 1) No action required: With (machine-marked) 'multiple choice' items, discrepancies are automatically excluded by the *ePen* marking system.
- 2) Action required: With 'short answer' items (LST 2a, VCB 2, GRM 2, RDG 3a), there may be (accidental) discrepancies in the scores awarded by the two markers. The Supervisor/Adjudicator should be on the lookout for any such discrepancies, and if they occur, should read the students' response and award the correct mark.

WRITING: In this section, student responses are independently marked by two markers using their judgement (based on the wording of the Rating Scale provided). As a result, differences may sometimes occur between the two scores awarded.

In such cases, there are two possible procedures:

- 1) Acceptable differences: If – as in most cases – the difference between the two scores is small, i.e. just **one level**, the Supervisor/Adjudicator is not required to read the student's response. He/She should simply use the mathematical average of the two scores. (* See below)
- 2) Unacceptable differences: However, if the difference between the two scores is substantial, i.e. **more than one level**, the Supervisor/Adjudicator should read the student's response and, after due consideration, decide on an appropriate mark.

CALCULATION OF AVERAGES:

WRT 1		WRT 2	
Pair of scores	Final score	Pair of scores	Final score
10 / 8	9	10 / 8	9
8 / 6	7	8 / 6	7
6 / 4	5	6 / 4	5
4 / 2	3	4 / 2	3
2 / 0	1	2 / 0	1

IMPORTANT NOTE: As in previous years, **individual** markers should **only** award the marks specified in the relevant Rating Scale* (as in 'pair of scores' above). 'In-between marks' (as in 'final score' above) can **only** be awarded when two (differing) individual marks are combined by the Supervisor/ Adjudicator.

[* Note: This means that, even though the computer screen shows all the possible final scores, **individual** markers should **only** use those scores which are mentioned in the scale.]
