*You are going to hear a story about a yacht called Kaz.*

***You will hear the text 3 times. Listen, answer and check***

Our story today is about a yacht called Kaz . Derek Batten was the owner of the yacht. Derek planned for a voyage from north to west Australia. He invited with him his two neighbours Peter and James. The yacht left the port on the Whitsundays coast on April 15 2007. The weather was windy and the sea was rough. After three days some fishermen saw the yacht and called a rescue team. The team caught up with the yacht and boarded it. There was no one on the board of the yacht. All the crew were missing.

After searching the team found the yacht in a good condition, and the engine was still working. Only the yacht's sails were badly damaged. They found a plate of food was set on the table and a laptop was left turned. Also the life jackets were there too.

The last moments of the men were recorded on a video tape by James .The video showed Derek directing the yacht. Peter was fishing in a very relaxing manner.

A wide search was done for five days, but unfortunately no sign of the men was ever found.
