You are going to hear **a text** about "**a bad journey in the amazon rain forest**".
Listen and for each item, write a short answer (**not more than FOUR WORDS**).

In February 2002, a team of American film makers went to Brazil to make a programme about "the people in the Amazon rainforest". They travelled to the Brazilian capital by plane and then sailed for hundreds of kilometres along the River Amazon. On their voyage, they saw a lot of strange sea creatures. They saw huge snakes, big fishes, dangerous crocodiles and lizards. They were attacked by one of the huge crocodiles. They succeeded in killing it by a huge hook.

When they got out of their boat, they started to walk through the forest. They saw lots of animals. They saw wild animals like lions, leopards, wolves and wild pigs. They also faced the dangerous insects and flies which cause diseases, but fortunately, a clever guide called "Tom" showed them the way to a small village where they talked to the people and filmed their life.

They began filming their everyday life. Then they filmed the way they hunt different kinds of animals for food and money. After that they filmed how they adapt their life with these all dangers around them. However, on their way back to the river, their guide, Tom, became very ill. Soon, they were lost in the forest for five days.

They faced a lot of dangers. A hungry lion chased them. It tried to eat one of them, but with their co-operation and courage, they killed the wild lion. They lost their camera and the film. While they were looking for the film, some poachers saw them. The poachers thought they were chasing them. They tried to shoot them by guns. The team ran away quickly. Later, an old man found them and took them to the river. They got home safely, but they weren't happy.
